

Live-Mail

LIVE-MAIL EXTENDS THE POWER OF THE WEB AWAY FROM THE BROWSER

Extend the power of SharePoint™ away from the Browser.

Capture the corporate knowledge that is flowing through your organization in e-mail. Live-Mail allows you to save emails and attachments as SharePoint™ documents. All corporate e-mail knowledge can be indexed and searched in SharePoint™.

The key advantage of Live-Mail is everything is done in e-mail.

For those who use e-mail as part of their daily routine, SharePoint™ becomes seamless as documents, discussions and tasks flow through e-mail. There is no special training since everyone knows how to use e-mail and no special client software is necessary. The power of SharePoint™ is leveraged as partners, customers and suppliers outside the firewall can participate in collaboration and discussions through e-mail. Live-Mail makes it easy for people to work with information thereby capturing more corporate knowledge for the enterprise to use. More knowledge and information means more productivity.

Specifications

E-Mail	All standard e-mail programs including: Outlook®, Outlook Express®
Servers	SharePoint™ Portal Server 2003, Windows SharePoint Services 2.0
Mail Servers	Any via POP3/SMTP servers

Key Features

- Save e-mail documents and attachments
- E-mail documents and discussions directly from SharePoint™
- Participate in on-line discussions via e-mail
- Capture important information from partners/vendors outside the corporate firewall
- Search archived e-mail documents with ease
- Allow external users to participate in discussions and document libraries
- Map an e-mail address and e-mail subject keywords to folders
- Work off-line by e-mailing selected documents and replying to the message

Benefits

Improve Corporate Knowledge Base

Important e-mail discussion threads can be captured, indexed and searched so that others can benefit from past history.

Participate Within SharePoint™ with Ease

Users can work within their e-mail program to send documents and participate in discussions from SharePoint™.

Work Offline

Livemail users can work offline and have their work saved to SharePoint™ when they reconnect. Supports multiple documents at the same time with check-out/in support.

Easy Installation

Since Live-Mail runs from a server, no special desktop software is needed to realize the benefits of this tool. Just install the server software and you will be Live-Mail enabled.
