

# WF Map Printer

## FACILITATE DESIGN REVIEWS WITH PRINTED WORKFLOW MAPS

How many times have you wished you could print a Livelink® Workflow Map or cut and pasted several screen shots to make a complete workflow map? It would be so much easier to explain and review the workflow processes with the project team. Even troubleshooting can be easier.

### To solve this problem we have developed Workflow Map Printer

to allow a user to generate a JPEG image of a Livelink® Workflow Map. Simply navigate to the workflow map to print, select where to save the image in Livelink® and then have the module generate the JPEG image. Once you have the JPEG image you can print, e-mail or use it in documentation.

The Livelink® Workflow Map must have content defined before the print option can be selected.

#### Key Features

- Generate a JPEG image of workflow maps
- JPEG image will be saved in Livelink®
- When desired the JPEG image can be printed, e-mailed and included in documentation
- Great for process and design reviews

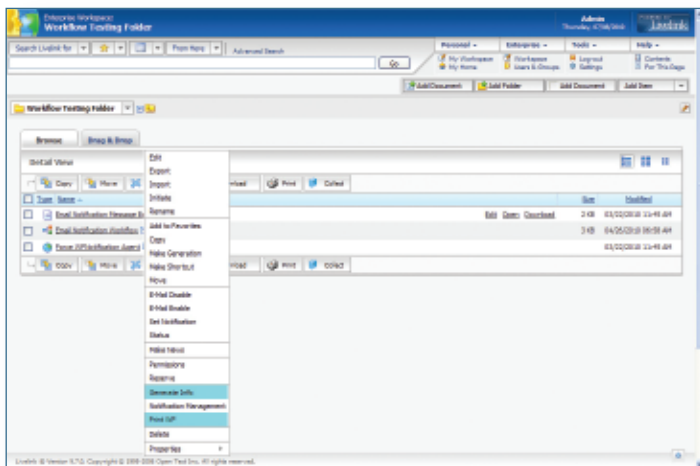

#### Benefits

#### Print Workflow Maps

Provides easy printing of Livelink® Workflow Maps.

#### Facilitate Reviews

Great for facilitating workflow process design, reviews and documentation.

#### Specifications

Browsers	All standard browsers
Servers	Livelink® Version 9.x on UNIX® and Windows®
Databases	Oracle®, SQL*Server®
